Portfolio Risk Allocation:

Less than or equal to (≤) 1.8

Moderate - Score 10 to 14

Your investment risk profile suggests that you have some understanding of investment markets and their behaviour. You do not wish to see all your capital eroded away by taxes and inflation and you are prepared to take short- to medium-term risk in order to gain longer-term capital growth. This indicates that you wish to have a moderate approach towards investing and the recommended asset allocation strategy would range between 60% to 70% products with risk = 1 (Developed Govt Fixed Income) and 30% to 40% products with risk = 5 (Regional or Single Country Equities).

Portfolio Risk Allocation:

More than (>) 1.8 and less than or equal to (≤) 2.6

Balanced - Score 15 to 21

Your investment risk profile suggests that you are seeking a greater growth component in your investment portfolio to help protect your capital from the eroding effect of taxes and inflation. While you remain cautious towards taking high levels of risk, your general understanding of investment markets enables you to feel comfortable with some short- to medium-term risk. Your priority is consistent capital growth with some income to smooth out any volatility in your returns. This indicates that you wish to have a balanced approach towards investing and the recommended asset allocation strategy would range between 40% to 50% products with risk = 1 (Developed Govt Fixed Income) and 50% to 60% products with risk = 5 (Regional or Single Country Equities).

Portfolio Risk Allocation:

More than (>) 2.6 and less than or equal to (≤) 3.4

Growth - Score 22 to 26

You are most interested in maximising the value of your investments through long-term capital growth, although you do not wish to make imbalanced investment decisions. You are comfortable with short- to medium-term volatility from your portfolio to maximise the potential for long-term capital growth. This indicates that you wish to have an assertive approach towards investing and the recommended asset allocation strategy would range between 20% to 30% products with risk = 1 (Developed Govt Fixed Income) and 70% to 80% products with risk = 5 (Regional or Single Country Equities).
